THE PEOPLE IN CANADA.

Some interesting figures are given in the eighteenth bulletin of the Canadian census taken in 1911, and issued yester-day which contains the statistics of ages of the people by single years, by totals for Canada, and for each of the special for Canada, and for each of the provinces, also comparative statistics of provinces, also comparative statistics of the distribution of the people by age periods in 1911 and 1901. The largest proposal for of persons under 10 years of age are found in Quebec, the lowest in principles of the provinces are the regions of young men and women, as is shown by the large per comen, as is shown by the large period, and the proposition stage period is to be found in British Coumbis, and that as we come eastward the proportion assumes a constantly decreasing future. That Canada is pre-emissity a country of young people in the proportion assumes a constantly decreasing future. 32 widowed. Of the female pop-n, 57.37 per cent. are single, 36.37 de and 5.31 widowed. One man fifteen women of under fifteen are ed. From 15 to 19 years, 1.20 per of males and 6.9 per cent. females married. The female population mbers the males in all of the castumbers the maies in an of the ear cities, while in the west the opp is found. In Montreal, however sexes are about equal in number.

The Straight Line in Creating Demand

"A Straight Line is the Shortest Distance between Two Points"

Whatever troubles old Buclid gave us in our schooldays his axioms were simple enough. In our business life to-day we show a lively appreciation of the truth of this axiom in cutting out superfluous efforts—in the saving of time and labor.

In making goods the straight line is "efficiency." It is the shortest distance between raw material and finished

In Selling Goods, the straight line is Newspaper Advertising.

It is the shortest distance between the seller and the buyer. Some manufacturers are applying the straight line in the making of their goods, but neglecting it in the selling of them. Some have no line of communication with the consumer at all—many let their message meander along bypaths of "chance acquaintanceship" instead of telegraphing it along the straight line of Newspaper Advertising.

Newspaper Advertising is the Shortest Distance between the two points of "Supply" and "Demand."
